

## **ROLE OF PHARMACY PROFESSIONALS IN COVID 19 PANDEMIC**

Now, with the world struggling to cope with the COVID 19 Pandemic, the responsibility of the pharmacist has increased manifold. As the lockdowns are being observed all over the globe and the national level pharmacy professionals are performing frontline roles, this editorial highlights the role of pharmacists in the COVID – 19 pandemics. Everyday we see vacancies for pharmacist at various hospitals as well as in many industries to meet the global requirement of a qualified workforce as well as to keep the supply chain of essential medicines intact. The need for an urgent intervention to stop the spread and to eradicate the COVID 19 situation entirely, the world is constantly looking forwards to pharmaceutical scientists in the research and development wing of various industries as well as research institutes, for a breakthrough.

The pandemic has catalysed the development of novel coronavirus vaccines across the Pharmaceutical and biopharmaceutical industry, and other research organisations and institutions throughout the world. So, in this time journey of crisis, Pharma is the only sector remains to the student with the availability of employment in the industry and research section and there is the shortage of workforce in the Pharma sector. The time has come when the world realizes the importance of Pharmacy as a subject and pharmacist as an integral part for human survival.
